Facts about the great interest rate war.

No matter what you may read about bank interest rates, keep this one clear fact in mind: **No bank anywhere is paying more than Fidelity.** And most are actually paying less than Fidelity on popular 2 year, automatically renewable 5¼% Certificates of Deposit. Here's why:

Fidelity compounds your interest **continuously**, not just daily. So the annual yield to you is more than 6%. It's 6.00315 to be exact.

So in the midst of all the current noise and confusion, just remember this one beautifully simple fact:

Our 6% annual yield on 5¼% Certificates of Deposit is bigger than their 6%.

And that is a fact!
